Securus Safeguard Browser for iPads

Comprehensive Online Safety for Today's Digital World of Education

The **Securus Safeguard Browser** transforms your school's iPads into secure learning environments, providing comprehensive protection both on and off site. As part of Securus' complete safeguarding suite, it works alongside our solutions for Windows, Chromebooks, and network monitoring that ensures consistent student safety.

By choosing the **Securus Safeguard Browser**, you are not just selecting a fully functioning browser – you are implementing a comprehensive solution that helps fulfil your safeguarding obligations while supporting student learning and encouraging positive behaviour.

Contact us today to learn how the **Securus Safeguard Browser** can enhance your school's online safety strategy
